Lover of maps, are you? I personally love getting lost in a big city, trying to get myself from point A to point B, but I guess I would never want to get lost in the middle of nowhere, whether that be with or without a map.

Nevertheless, maps get us to places we want to go and help us see the world from a different perspective; and that's exactly what this map does.

KMZ maps are Earth Maps that enhance and customize your Google Earth experience. With this map, you can easily wrap around the globe in your Google Earth software, creating stunning and beautiful visualizations.

There are 5 different collections to choose from:

- Stylized Earth Maps
- Solid Color Earth Maps
- Latitude Longitude Earth Maps
- Natural Terrain Earth Maps
- Vector Lines Collection
